Education

University of California Riverside | Sept 2021 - June 2025

- Major: Computer Science with Business Applications

North High School | Sept 2017 - June 2021

- Vice President of Coding Club
- Treasurer of California Scholarship Federation

Experience

Internships:

- Facebook Career Connections Program | Apr - Aug 2021
 - Trained in digital media marketing to understand effective online advertising methods; interned with Tier One Credit where I managed multiple social media platforms, and helped develop ad campaign strategies to generate leads and funnel them into various sales channels

Relevant Classes:

- CS010 A, B, C - Introductory to intermediate level C++ programming
- CS061 - Intro to Assembly

Hackathon:

- Rose Hack 2023 - UCR's Women-Centric Hackathon (**winner**)
 - Created a study hub website for students built on HTML, CSS, and JavaScript in a team of 3 members
 - Utilized a Spotify API to provide users with music as they studied
 - Created a Pomodoro Timer and To-Do List to help students keep track of assignments
 - Incorporated a game component to incentivize users to come back and buy UI elements for the cafe as they study more and accumulate coins

Projects:

- Arithmetic Expression Tree | Nov 2022
 - Implemented a program in C++ that builds and traverses an arithmetic expression tree and outputs the resulting tree using Graph Visualization Software.
- Movie Review Sentiment Analysis | Nov 2022
 - Created a program in C++ that takes over 8,000 movie reviews as inputs for hashtables to rate the sentiments of each word passed in from the reviews to create a final rating for the movie itself from a scale of 0 (negative) to 4 (positive).

Skills

- Programming languages
 - C++, Python, HTML, CSS, Javascript, Assembly
